white moulded

## Platinum White Moulded

Crabtree Platinum White Moulded is a new addition to the already extensive range of Platinum Low Profile Wiring Accessories. A wide selection of Power, Control and Lighting accessories are now available in 'Screwless' Low Profile.

The front plate is clipped onto the clear plastic frame surrounding the interior. The plate is easily removed using a flat bladed screwdriver. The screwdriver should be inserted between the notch on the bottom of the plate and the ramp on the support frame.

The front plate is easily clipped back into position on the clear plastic frame, surrounding the interior.

The plate should be gently eased away from the support frame, and can now be stored away in a safe place until decoration is complete.

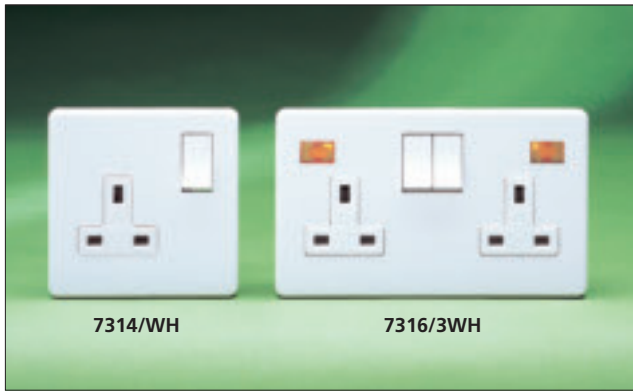

If required, the Platinum white moulded range can be upgraded by using standard low profile Platinum plates.

Decoration can be safely completed without damage to the Wiring Accessory.

Once the moulded plate is removed as described previously, and, having chosen which finish is required, (Satin Chrome, Polished Brass, or Highly Polished Chrome), the replacement front plate simply clips back onto the support frame.
